***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 27 recites the limitation "R6 being optionally substituted" . There is insufficient antecedent basis for this limitation in the claim.

Claim 1 from which claim 27 depends does not have basis for, e.g. R6 = oxo substituted on aryl. Neither is there support for other groups such as acyl, acylamino, amino, cyano, thio, nitro, aroyl etc.

Claims 28-30 and 32 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim may not depend from more than one independent claim. See MPEP § 608.01(n).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,27,28,30,32 are rejected under 35 U.S.C. 102(b) as being anticipated by Loots et al US 4849414 or Jackson et al US 5672592.

Loot et al and Jackson et al both teach compounds corresponds to applicants' formula (I) where R1 is NH<sub>2</sub>, X = (CH<sub>2</sub>)<sub>1-4</sub>, Y = O, R2 = H, R3 = COOH and R4 is a proline isostere. See respectively, RN 118636-20-7 and RN 200699-96-3.

No claim is allowed.
